

## DESCRIPTION

The AP-DR Gypsum Access Panels manufactured by Wind-lock® are designed to be an attractive alternative to typical access panels in commercial and residential buildings. These panels can be used in ceilings and walls. Their glass-fiber-reinforced-gypsum (GFRG) based construction can't rust and blends seamlessly with new or retrofitted drywall ceilings and walls. The design of the stealth, drop-in access panel ensures that your aesthetic style is noticed and not your access panels.

## FEATURES

- Aesthetic Excellence
- Durability and Longevity
- Unobtrusive Design
- Versatility
